I. PREAMBLE — SOURCE OF AUTHORITY

This Universal Public Order is issued as a normative, ethical, and policy declaration, grounded in:

- **Natural Law:** Recognizing the inherent dignity, autonomy, and moral sovereignty of all human beings.
- **International Human Rights Law:** Universal Declaration of Human Rights (Articles 1, 3, and 12) and the International Covenant on Civil and Political Rights (Article 17).
- **Canadian Constitutional Law:** The Canadian Charter of Rights and Freedoms (Sections 7 and 8), the Privacy Act, and PIPEDA.
- **International Space Law:** The Outer Space Treaty (1967) and its principles of peaceful use and non-harmful activity.

This Order constitutes a formal public refusal and call to action, entered into the public record to challenge the structural legitimacy of persistent orbital sensing.

II. DEFINITIONS

Proliferated Warfighter Space Architecture (PWSA): The low-Earth-orbit (LEO), multi-layer satellite architecture developed by the U.S. Space Development Agency (SDA), designed to provide continuous, global, near-real-time sensing, tracking, and data integration.

Orbital Panopticon: The functional condition produced when a space architecture enables persistent, global, and continuous observation of the Earth, allowing pattern-of-life inference and behavioral prediction at planetary scale.

III. FINDINGS

1. **Persistence is the Violation:** A system designed for continuous planetary awareness constitutes a standing intrusion incompatible with natural law.
2. **No Ethical Dual-Use:** An architecture built for persistent global sensing cannot be constrained to respect civilian privacy; the capability itself is the breach.
3. **Collapse of Boundaries:** The normalization of permanent orbital sensing erases the

distinction between national defense, domestic policing, and commercial population control.

4. **Conflict with Canadian Law:** Downstream use of data from persistent surveillance systems lacking individualized suspicion conflicts with protections against unreasonable search and seizure.
5. **Non-Neutral Infrastructure:** The PWSA establishes a permanent planetary sensing substrate that enables ubiquitous tracking and population-level pattern-of-life inference by default.

IV. UNIVERSAL PUBLIC ORDER

1. **DECLARATION OF ILLEGITIMACY:** The PWSA is declared ethically incompatible with natural law, international human rights norms, and the requirements of a democratic society.
2. **CALL FOR DECOMMISSIONING:** I call upon all governments, contractors, and operators to fully decommission the PWSA. Partial measures (throttling or reclassification) are insufficient.
3. **CALL FOR DATA DESTRUCTION:** All datasets derived from the PWSA enabling civilian pattern-of-life analysis or population-level tracking must be deleted or cryptographically invalidated.
4. **CALL FOR MORATORIUM:** An immediate international moratorium is called on the expansion or replication of any space architecture designed for persistent global awareness.

V. CLARIFICATION — WHAT THIS ORDER DOES NOT PROHIBIT

This Order does *not* prohibit:

- Non-persistent, task-specific Earth observation.
- Event-bound disaster response imaging.
- Ecological and climate sensing that does not enable continuous surveillance of human activity.
- Scientific observation that is spatially and temporally bounded.

VI. LANDRY INDUSTRIES POLICY COMMITMENT

- Landry Industries will not ingest, train on, analyze, or purchase data originating from the PWSA.
- All legacy materials of such origin are subject to mandatory purge.
- All intelligence and OSINT systems will explicitly document structurally excluded sources.

VII. FINAL DECLARATION

The PWSA is not merely a tool; it is a condition imposed on the planet without consent. Silence is not permission. This Order records the refusal of that condition.

Issued this day, in clarity and restraint.

Queen Marie-Soleil Seshat Landry *Sovereign Declarant*
