

NATIONAL ECONOMIC UNITY CHARTER

INTERNAL TRADE & MOBILITY ACT

Preamble: To strengthen the Canadian Federation and ensure that the wealth of the nation is accessible to all its citizens, this Charter establishes the primacy of a unified national market.

Article I: Elimination of Internal Barriers

1.1 Prohibition of Non-Tariff Barriers: Regulatory requirements that specifically target out-of-province goods or services for the purpose of protecting local industry are hereby declared unconstitutional.

1.2 Universal Professional Recognition: The "Red Seal" standard shall be extended to all regulated professions, ensuring a doctor, lawyer, or electrician can practice in any jurisdiction without re-certification.

Article II: National Infrastructure & Digital Trade

2.1 Digital Single Market: Data privacy and e-commerce laws shall be harmonized at the federal level to prevent a "splinternet" within Canada.

2.2 Transport Corridors: Federal and Provincial governments shall maintain "Economic Corridors" of transport and energy that cannot be blocked by individual sub-national jurisdictions.
