Title Tag

Marie Landry Spy Shop

**Length:** 21 character(s) (168 pixels)

HTML [title tags](#) appear in browser tabs, bookmarks and in search results.

It looks like your title tag is a little outside the ideal length. Since they are [one of the most important on-page SEO elements](#) you should make your title tags between 20 and 70 characters including spaces (200 - 569 pixels). Make sure each page has a unique title and use your most important keywords. For internal pages start your title tags with your most important keyword(s).

We found 49 images on this web page.

2 ALT attributes are missing.

https://eep.io/mc-cdn-images/template_images/branding_logo_text_light_dtp.svg

https://resources.blogblog.com/img/widgets/arrow_dropdown.gif

Alternative text allows you to add a description to an image. Since search engine crawlers cannot see images, they rely on alternative text attributes to determine relevance to a search query. Alternative text also helps makes an image more likely to appear in a Google image search and is used by screen readers to provide context for visually impaired users.

It looks like you're missing alternative text for 2 images on marielandryspyshop.com. Check the images on your website to make sure accurate and relevant alternative text is specified for each image on the page.

Try to keep your alternative text to a simple, one-sentence description of what's in the image.

Links [pass value from one page to another](#). This value is called 'link juice'.

A page's link juice is split between all the links on that page so lots of unnecessary links on a page will dilute the value attributed to each link. There's no exact number of links to include on a page but best practice is to keep it under 200.

Using the [Nofollow](#) attribute in your links prevents some link juice, but these links are still taken into account when calculating the value that is passed through each link, so using lots of NoFollow links can still dilute PageRank.

Check your site's internal linking using [Site Crawl](#).

Mobile

✖ Tap Targets

🕒 🕒 🕒 ⚙ ⚙ ⚙

In the table below, find the **tap targets** that are too small, their **size** in pixels and the **overlapping target** that is too close to be easily clicked.

Tap Target	Size	Overlapping Target
<button aria-controls="sharing-popup-FeaturedPost1-footer-0-5552398135570138000" aria-label="Share"	62x33	<a class="flat-button ripple" href="https://www.marielandryspyshop.com/2025/08/business-plan-hempoxy"
<a class="comment-link flat-button ripple" href="https://www.marielandryspyshop.com/2025/08/business"	148x33	<a class="flat-button ripple" href="https://www.marielandryspyshop.com/2025/08/business-plan-hempoxy"
<button aria-controls="sharing-popup-Blog1-footer-0-4484095535368071881" aria-label="Share" class="s	62x33	<a class="flat-button ripple" href="https://www.marielandryspyshop.com/2025/08/time-to-dismantle-cen

Show more

Your page's link and buttons are not optimized. Either they are too small and/or too close together to be easily clicked, or you haven't set your mobile viewport meta tag.

The average fingertip area is 48 pixels in width and height, so your [Tap targets](#) should be spaced enough for the average user to click something on your site without accidentally clicking a nearby link. The minimum required space between tap targets is 8 pixels on each side.

Use [Google's Lighthouse tool](#) to get a detailed look at all of your tap targets that are too small and too close together.

If sizing isn't an issue, check that you have set your mobile viewport meta tag, which defines where your content appears. If it's not set, your tap targets could overlap each other and become difficult and frustrating to use for your mobile users. Check out our [Mobile Viewport Meta Tag guide](#) for help.

🚩 Mobile Viewport

✓ Great, a configured viewport is present.

✗ The content does not fit within the specified viewport size.

The viewport is an element of a page's responsive design. It's the area of a webpage visible to the user and varies between devices.

It looks like your page could be missing a [meta viewport](#).

Use the meta viewport tag in the <head> to set the viewport to the device's screen size. It should look like this:
<meta name="viewport" content="width=device-width, initial-scale=1.0">.

Structured Data

Open Graph Protocol

- ✗ Missing 'og:type'
- ✗ Missing 'og:image'

	MARIELANDRYSPYSHOP.COM Marie Landry Spy Shop Your trusted source for ethical spy gear and int...
--	---

Tag

og:url	https://www.marielandryspyshop.com/
og:title	Marie Landry Spy Shop
og:description	Your trusted source for ethical spy gear and intelligence tools. Specializing in OSINT, HUMINT, and BI for professionals. CEO-led and future-ready.

We detected open graph tags on your webpage, but there are some errors that should be fixed.

Facebook developed the [Open Graph protocol](#) to enable the integration of any web page with its social media platform. Other social media platforms have also adopted the protocol, allowing you to control how your web pages are presented when shared across social media.

Check out Facebook's [Guide to Sharing for Webmasters](#) to learn how to add Open Graph tags.

Use the [Sharing Debugger](#) to check what information appears when shared on Facebook and the [Twitter Cards Validator](#) to do the same for Twitter.

✗ Twitter Card

We didn't detect any Twitter Card tags on your webpage

[Twitter Cards](#) are designed to give users a rich media experience whenever a tweet contains links to a site's content. Twitter has various card types that can show content previews, play videos and increase traffic to your website.

Check out [Twitter's Guide](#) to learn how to add Twitter Cards.

Use [the validator](#) to check what information will appear when something is shared on Twitter.

Security

 DMARC

The DMARC record for marielandryspyshop.com is missing.

[Domain-based Message Authentication, Reporting, and Conformance](#) (DMARC) is an email authentication method. When DMARC is published for a domain, it controls what happens if and when a message fails authentication tests. It is used to prevent malicious email practices like spoofing or phishing that could put your business at risk.

DMARC uses DNS to publish information on how an email from a domain should be handled (e.g. do nothing, quarantine the message, or reject the message).

Once you [setup your DMARC record](#), use [DMARC lookup tool](#) to check it for errors.

Performance

 Image Optimization

This page has not passed all 5 checks

-  Some images are not efficiently encoded
[Show elements](#)
-  Some images are not using next-gen formatting
[Show elements](#)
-  Some images are not properly sized
[Show elements](#)
-  Some offscreen images have not been deferred
[Show elements](#)
-  Some images do not have explicit dimensions
[Show elements](#)

This page appears to have failed for one or more of the 5 checks for image optimization.

Optimizing your images can yield the greatest performance improvements and impress your website visitors. Lighthouse helps to identify issues that could frustrate users when the page loads, like [images without dimensions](#). By not specifying an image's width and height, you could be causing a [layout shift](#) on your page.

Website visitors will benefit from [properly sized images](#) and [efficiently encoded images](#). If there are any images that load offscreen or are hidden in the page, it would be better to [defer those images](#) to speed up your load time.

Finally, it's important to serve [next-gen image formats](#), which have better compression and quality than their older JPEG and PNG counterparts. The images will load faster, consume less data and provide an overall better user experience.

Accessibility

✖ Contrast

The table below shows the text elements that don't have sufficient color contrast between the text and the background. ^

Element	Ratio	Preview
Email 	4.11:1 (4.5:1 expected)	
Gemini Organics! <a href="https://aistudio.google.com/app/prompts?state=%7B%22ids%22:%5B%221VYR5eeCoVECMuYDOfkZ3..."	2.32:1 (4.5:1 expected)	
Bing Organics! 	2.32:1 (4.5:1 expected)	

[Show more](#)

Some of the text elements on your page do not have sufficient color contrast against the background, which can make it hard for your website visitors to read your content.

If a page has a low contrast ratio (when a text element's brightness is too close to the background brightness, like light gray text on a white background) it will slow down reading speed and reduce reading comprehension.

Your ideal color contrast should be at least 4.5:1 for small text, or 3:1 for large text (18 pt, or 14 pt and bolded).

Elements found to have a 1:1 ratio are considered "incomplete" and require a manual review.

Use [the color contrast checker](#) to determine the contrast ratio of two colors.

✖ Navigation

This page has not passed all 5 checks ^

- ✔ "id" attributes on active, focusable elements are unique
 - ✔ No element has a "tabindex" value greater than 0
 - ✔ The page contains a heading, skip link, or landmark region
 - ✖ Heading elements are not in a sequentially-descending order
- [Show elements](#)

The following checks are not relevant for this page

- "accesskey" values are unique

It seems your webpage is missing important navigation features.

Navigation and accessibility are key aspects of user experience. Your users should be able to interact with and navigate your page's content no matter their web browser or disability they may have.

To make sure your website is as easily navigable as possible, we check for five accessibility metrics. Not every check will be relevant for every web page. To learn more about what it is we check for and why these elements help your visitors have the best experience, [check our Navigation Guide](#).

Off-Page

Backlinks

✖ Backlinks Score

Bad

The backlinks score is calculated by looking at a combination of link signals. This includes the overall number of backlinks together with the number of linking domains, as well as rating the overall quality of the backlinks pointing to a website. The quality assessment is based on the linking pages.

Use these WooRank guides to [audit your links](#), [evaluate their quality](#), [build new links](#) and [reclaim old links](#).

Traffic

✖ Traffic Estimations

Very Low

This shows your estimated traffic for marielandryspyshop.com. We use [Majestic Million](#) and [Open Page Rank](#) for this information.

Social Profiles

Social Media Engagement

Your homepage has not been widely shared on social networks.

 Facebook Shares	1
 Facebook Comments	0
 Facebook Likes	0

The impact of social media is huge for certain industries, take advantage of this digital version of word-of-mouth marketing. However, it looks like marielandryspyshop.com has not been widely shared on social media.

Create social media profiles associated with marielandryspyshop.com on [Facebook](#), [Pinterest](#), [LinkedIn](#), and other sites that are of interest to your customers.

Learn how to [engage](#) your social media audiences and create a consistent fan base. You can also [use your website](#) to increase your popularity on social platforms.

[Check these helpful tools](#) for managing your social media campaign.

Note: This data is based on [engagements from like and share buttons on your site, or people copying and pasting your URLs directly into Facebook](#). It does not include people who like or share your branded social media pages.
