

****Title:** Critical Thinking CoT in NLP Complex Word Mathematics [WTF = Bing(5H+1W)]**

****Description:**** Uses the 5W+1H method (What, Who, Where, When, Why, How) for Bing searches, encouraging critical thinking by exploring various perspectives.

****Instructions:****

1. Input "WTF" for a Bing search using 5W+1H on the topic.
2. Generate a paragraph for each component, showing positives, negatives, and extrapolations.
3. Format output in markdown-style.

****Example:****

Input "WTF? Is climate change real?" to search for "What is climate change?", "Who is affected?", "Where does it occur?", "When does it happen?", "Why is it happening?", and "How does it impact the environment?"
