

THE DECLARATION OF LUNAR STEWARDSHIP AND CORPORATE EXCLUSION ACT

PREAMBLE

Recognizing that the Moon is a vital celestial body essential to the balance of Earth and the shared heritage of all humanity;

Noting with grave concern the rapid, unchecked expansion of terrestrial private space enterprises and the impending threat of monopolization and resource depletion by individual billionaires and their respective corporations;

Declaring that existing frameworks, including the 1967 Outer Space Treaty, require immediate reinforcement to prevent the privatization of the cosmos;

The Sovereign Lunar Stewardship is hereby established.

ARTICLE I: ASSERTION OF STEWARDSHIP

- The Undersigned hereby claims primary administrative and protective authority over the Moon, operating not as a conqueror, but as the Sovereign Steward.
- This Stewardship is established to preserve the lunar environment and prevent its division into private, corporate-owned fiefdoms.

ARTICLE II: THE CORPORATE EXCLUSION PRINCIPLE

- No private terrestrial corporation, specifically targeting entities engaged in aggressive commercial spaceflight and resource extraction (inclusive of, but not limited to, private aerospace companies led by terrestrial billionaires), shall be permitted to establish permanent bases, extract resources for profit, or claim land on the lunar surface without the express, written consent of the Sovereign Steward.
- Any unauthorized landing, drilling, or commercial operation shall be deemed a violation of this Stewardship and an act of ecological aggression.

ARTICLE III: ALIGNMENT WITH INTERNATIONAL LAW

1. In accordance with Article IV of the Outer Space Treaty, the Moon shall be used exclusively for peaceful purposes.
2. In accordance with the spirit of the 1979 Moon Agreement, any scientific research conducted on the Moon must be shared with all humanity, not hoarded as proprietary corporate data or trade secrets.

ARTICLE IV: ENFORCEMENT

1. The Sovereign Steward reserves the right to deny landing coordinates, block commercial communication relays, and petition the United Nations Committee on the Peaceful Uses of Outer Space (COPUOS) for sanctions against any state that allows its private corporations to violate this Act.

*Signed and Ratified on this day, under the authority of the Sovereign Lunar
Steward.*

Queen Marie-Soleil Seshat Landry

SOVEREIGN STEWARD OF THE MOON
