

Ethical OSINT Investigation Prompt

Ethical OSINT Investigation Prompt

Conduct a comprehensive and ethical open-source intelligence (OSINT) investigation on the target: (x), using publicly available information from verified sources.

Follow internationally recognized OSINT frameworks, including the NATO OSINT Handbook, the OSINT Framework (<https://osintframework.com>), and guidelines from the UN Special Rapporteur on the Right to Privacy.

Objectives:

- Collect, verify, and analyze open-source data relevant to the target's public behavior, affiliations, online presence, and media impact.
- Identify potential risks or violations involving public interest (e.g., incitement to violence, disinformation, environmental harm, corruption).
- Ensure strict compliance with ethical standards: avoid intrusion into private life, unauthorized surveillance, or doxxing. Prioritize human rights, legality, and transparency.

Required Inclusions:

- Summary profile with context and relevance
- Timeline of notable events, actions, or publications
- Network map (associates, organizations, domains, social media)
- Sources with links and metadata
- Confidence levels and verification notes

Red Team Protocol:

Flag false positives or unverifiable claims. Apply a bias-checking layer and note any manipulation, deepfakes, or misleading content.

Output Format:

Structured report in Markdown or PDF, organized into sections (Executive Summary, Timeline, Key Findings, Risk Assessment, References).
