

Dear Cassie,

I hope this message finds you well. I wanted to share some of my recent AI endeavors with you. Firstly, I've created over 150 custom GPTs on OpenAI and 34 on Poe, enabling me to perform autonomous Scientific NLP magic. I'm also considering submitting the "MissionGPT" Framework, which you can find more about on OpenAI [here](<https://chatgpt.com/g/g-Bdmp9Bbuu-missiongpt-v-4-0-6>) and on Poe [here](<https://poe.com/MissionGPT-bot>).

I'm currently exploring whether Snowflake can process my 220-page pre-prompt document for MissionGPT 4.0.6, and I'm excited to find out. Additionally, I've developed autonomous critically thinking scientific bots, such as the one exemplified in the case of "WTF is a Banana?" which you can check out [here](<https://chat.openai.com/share/ccca0543-4fdc-4491-a5ed-799f8989b034>).

I've also created hundreds of variants of the scientific method for NLP applications, leading to the development of 220-Bot, 300-Bot, and 500-Bot, all available on OpenAI. These bots have autonomously designed thousands of experiments, published on blogs for feedback and crowdsourcing. You can find some ongoing scientific experiments in the attached documents.

Moreover, I've authored a couple of books on the future of AI, and I've delved into the realm of Animal Language Processing, exploring its untapped potential for interspecies understanding. You can find more about this in my blog post [here](<https://www.marielandryceo.com/2024/05/the-untapped-potential-of-animal.html>).

I look forward to trying out the Snowflake/Streamlit environment for these purposes and would appreciate any feedback you may have. Feel free to explore my open-source Intelligence (OSINT) documentation in my public Google Drive [here](<https://drive.google.com/drive/folders/152tcCZ-Y2rOR9fNIlgXzNh6COPi0THwi>) and on my blog [here](www.marielandryceo.com). Transparency and ethics are core values in my work, and I believe these documents hold valuable insights that I'm happy to share with the community.

Best regards,

Marie Seshat Landry
