Professional Summary

Marie-Soleil Seshat Landry is a visionary CEO, transdisciplinary entrepreneur, citizen scientist, and spymaster who has transformed the landscape of ethical intelligence, artificial intelligence, and sustainable development. With a remarkable track record of integrating cutting-edge AI with organic and socially responsible practices, she has been at the forefront of pioneering autonomous science. As the inventor of the WTF 5.0 Method of Scientific Critical Thinking, Marie has revolutionized the way autonomous systems and researchers tackle complex scientific challenges. She is the founder of Landry Industries, an umbrella organization encompassing ventures like Marie Landry's Spy Shop, SearchForOrganics.com, and Diamond Composites. Her work integrates materials science, regenerative design, and ethical AI to accelerate the Organic Revolution of 2030, aligned with the UN Sustainable Development Goals.

Work Experience

CEO / Spymaster

Marie Landry's Spy Shop | *Moncton, NB, Canada* | *Sep 2019 – Present*

- Founded and scaled a pioneering intelligence firm specializing in ethical OSINT (Open Source Intelligence) and HUMINT (Human Intelligence) operations.
- Developed and deployed proprietary AI models (e.g., MissionGPT, 500-Bot, OSINT Companion) that automate critical data analysis and strategic reporting.
- Served prestigious clients including NATO and governmental agencies, significantly enhancing global security frameworks and business intelligence capabilities.
- Championed ethical intelligence, ensuring all activities adhere to legal standards and ethical guidelines.

Chief Executive Officer

Global Organic Solutions | *Moncton, NB, Canada* | *Jun 2023 – Present*

- Implemented innovative practices in organic farming and sustainable resource management to address global challenges such as hunger, pollution, and environmental degradation.
- Developed practical, eco-friendly solutions promoting food security and environmental sustainability.

Chief Executive Officer

Search For Organics | *Moncton, NB, Canada* | *Jun 2008 – Present*

- Launched a specialized search engine and marketplace dedicated to organic products, championing transparency and quality.
- Promoted the Universal Declaration of Organic Rights (UDOR), establishing high standards for organic certification.
- Utilized advanced digital marketing strategies (SEO, content marketing) to achieve extensive global reach.

Founder & CEO

Diamond Composites | *Moncton, NB, Canada*

- Pioneered research and development in hemp-integrated composite materials, such as hemp-derived carbon nanosheet composites (HDCNS-Composites).
- Applied sustainable innovation for construction, renewable energy, and defense applications.
- Secured strategic partnerships, including international interest from NATO, to commercialize advanced eco-materials.

CEO / Spymaster

Spymaster Enterprises | *Moncton, NB, Canada* | *Jun 2007 – Present*

- Led various intelligence and strategic initiatives under the Spymaster Enterprises banner.

Key Projects & Initiatives

- **Landry Industries:** An umbrella venture exploring innovative business strategies and industrial solutions with an emphasis on sustainability.

- **New Pyramids Project:** A visionary initiative aimed at building 10,000 sustainable, solar-powered energy stations and vertical greenhouses by 2030.
 - **PeaceMakerGPT:** An AI-driven tool designed to generate strategic documents supporting peace-building and conflict resolution.
 - **Scientibots — Autonomous Science:** Designed and published thousands of scientific experiments in life sciences, biology, and materials science using custom autonomous GPT models.
 - **AI Synergy Hub:** A digital nexus for AI innovation, curating resources and fostering collaboration between academia and industry.
 - **PDF Battle:** An online platform designed for in-depth analysis and debate of scientific and business PDFs.
-

Skills

Technical Skills:

- Artificial Intelligence & Machine Learning (NLP, autonomous GPT models)
- Open Source Intelligence (OSINT) & Human Intelligence (HUMINT)
- Scientific research and experimental design automation
- Sustainable material science (Hemp composite R&D, Hempoxy)
- Advanced SEO, digital marketing, and content strategy
- Web Development (HTML)

Soft Skills:

- Visionary Leadership & Strategic Thinking
 - Ethical Intelligence & Social Responsibility
 - Entrepreneurial Initiative and Venture Management
 - Digital Content Creation (Author of 2500+ blog posts)
 - Peace Advocacy & Social Justice
-

 - **A Brain-Inspired Framework for Next-Generation Quantum Multimodal Computing: An Open-Source Roadmap** (Zenodo, Mar 2025)
 - **Scientific Proof: Incarceration is Inhumane and Violates Human Rights** (Zenodo, Mar 2025)
 - **Mathematical Intelligence Unleashed** (Spymaster Enterprises, Mar 2025)
-

Philosophy & Vision

Marie-Soleil Seshat Landry is driven by a vision of sustainable progress, ethical innovation, and the **Organic Revolution of 2030**. She advocates for the harmonious integration of technology and nature to create a more equitable, sustainable world. As a proud trans woman and advocate for LGBTQ+ rights, she champions inclusive innovation that unites social justice, scientific rigor, and global sustainability. Her work emphasizes ethical AI, digital sovereignty, and the dismantling of predatory systems to build a sovereign, sustainable future.
