

MARIE LANDRY'S SPY SHOP

Ethical Intelligence & Deterministic AI Solutions

Marie-Soleil Seshat Landry | Spymaster & CEO | Virtual Consultancy | Global Reach

marielandryspyshop.com

About the Firm

Marie Landry's Spy Shop is an ethics-first OSINT consultancy and AI systems practice delivering verified, actionable intelligence to enterprise clients, legal teams, and institutional partners. Every engagement is governed by a zero-tolerance standard for unverified data. We do not deliver inferences presented as facts — only rigorously confirmed intelligence and deterministic AI architectures.

Our practice is built on a decade of solo OSINT tradecraft, supplemented by proprietary methodological frameworks developed and published under open academic licenses. Bilingual (EN/FR) operations. Canadian-based. Globally deployable.

Service Matrix

TIER 1

Tactical OSINT & Digital Footprinting

Scope:

- Verification of isolated claims and contested assertions
- Digital footprint mapping and online exposure assessment
- Baseline threat assessments and person-of-interest profiling
- Targeted intelligence gathering for legal or operational use

Engagement Rates:

- \$150 – \$200 / Hour (minimum 5-hour engagement)

Outcome: Clean, actionable intelligence that verifies or definitively refutes specific operational variables.

TIER 2

Business Intelligence & Corporate Due Diligence

Scope:

- Comprehensive corporate vetting and beneficial ownership mapping
- Deep-network relationship and affiliation analysis
- Competitive intelligence and market-position assessments
- Ethical threat assessments for M&A, partnerships, and litigation support

Engagement Rates:

- \$5,000 – \$15,000 | Standard Assessment
- \$20,000 – \$35,000 | Deep-Dive Due Diligence

Outcome: A comprehensive intelligence report detailing vulnerabilities, hidden assets, and verified market realities.

TIER 3

AI Systems Architecture & Sci-Intel Consulting

Scope:

- Design and deployment of hallucination-free AI workflows
- Custom enterprise intelligence loops built on the 1=1=1 architecture
- Integration of OSINT pipelines with AI-assisted analysis layers
- Governance frameworks for AI-assisted decision-making

Engagement Rates:

- \$50,000+ | Custom Architecture Build
- \$5,000 – \$10,000 / Month | Advisory Retainer (10–20 hrs)
- \$15,000 – \$30,000 / Month | Comprehensive Partnership

Outcome: Autonomous, secure, and auditable AI operations that refuse to produce unverified outputs.

Proprietary Frameworks & Credentials

Seshat's Axiom / LHFP	Landry Hallucination-Free Protocol — the zero-hallucination governance standard underlying all AI deliverables. DOI: 10.5281/zenodo.16944339
1=1=1 Law	Retrieve = Store = Cite. Every data point in a deliverable must exist in verified source material — no inference, no fabrication. DOI: 10.5281/zenodo.17477620
FC/NV Architecture	Fact-Constant / Narrative-Variable — a structured AI output model that separates immutable facts from interpretive narrative, preventing hallucination at the architecture level.
WTF 8.0 Framework	Workflow for Truthfinding — a 113-point scientific-method-grounded intelligence methodology governing all investigative engagements.
ORCID / Publication Record	ORCID 0009-0008-5027-3337 135+ peer-indexed publications on Zenodo covering OSINT methodology, AI governance, and intelligence ethics.
Operator Profile	Solo practitioner. 10+ years OSINT experience. Google Developer Program member. Bilingual (EN/FR). Custom LLM development across OpenAI, Poe, and Gemini platforms.

Operational Standard

Every deliverable produced by this practice is subject to mandatory verification states. No claim is included in a final report unless it has been confirmed against a live, auditable source. If a fact cannot be verified, it is explicitly flagged as theoretical or excluded entirely. This standard applies equally to human-authored analysis and AI-assisted outputs. Clients receive a verification manifest alongside all reports.

Secure your intelligence infrastructure. Engage with confidence.
