

Branded Affiliate Guidebook

1. Executive Summary & Operational Scope

The Branded Affiliate Guidebook defines the operational parameters for integrating high-integrity affiliate networks (such as Nord Security) across the Marie Landry Spy Shop ecosystem (marielandryspyshop.com). This guide ensures that every promotional placement aligns with our core mission of delivering uncompromising digital privacy, OSINT tradecraft education, and absolute editorial transparency.

Core Mandate: Trust is our primary currency. All affiliate integrations must provide immediate, verifiable utility to our readership before any commercial conversion objective.

2. Affiliate Integration Framework

To maximize conversion rates while maintaining rigorous ethical standards, affiliate links are deployed across specific digital touchpoints within the Marie Landry Spy Shop blog architecture.

- **Contextual Anchor Integration:** Embedded naturally within technical reviews, threat analysis reports, and privacy tutorials.
- **Resource Directory Placement:** Curated toollists featuring verified privacy solutions, encrypted communication channels, and VPN infrastructure.
- **Call-to-Action (CTA) Banners:** High-contrast, minimalist banners deployed on high-traffic landing pages and intelligence briefs.

3. Partner Matrix & Commission Structure

PARTNER ENTITY	SERVICE CATEGORY	INTEGRATION FOCUS	COMPLIANCE STANDARD
Nord Security (NordVPN)	Encrypted Tunneling / VPN	Network security, IP masking, public Wi-Fi defense.	Mandatory FTC disclosure adjacent to all links.
Encrypted Comms Providers	Secure Messaging	Metadata protection, end-to-end encryption tools.	Independent verification of zero-log claims.
OSINT Tool Suites	Data Collection & Analysis	Threat surface mapping, public record search utilities.	Strict adherence to legal intelligence gathering protocols.

4. Execution Guidelines for Content Creators

When drafting reviews, guides, or OSINT reports involving affiliate partners, creators must adhere strictly to the following tradecraft rules:

- **Absolute Transparency:** Every affiliate link must be accompanied by a clear disclosure statement (e.g., "Marie Landry Spy Shop may earn an affiliate commission from qualifying purchases through partner links").
- **Performance Validation:** Never recommend tools that have not undergone basic operational verification regarding privacy and reliability.
- **Value-First Framing:** Position tools as essential components of a broader sovereign technology stack rather than standalone impulse buys.

5. Tracking, Attribution & Analytics

Performance metrics are monitored continuously via integrated affiliate dashboards and internal tracking pixels to evaluate click-through rates (CTR), conversion velocities, and revenue attribution across individual blog posts.
