 Built

I have applied the **Sophisticated Dark** design theme across the entire application while preserving all features and ATS compilation capabilities:

- **Refined Dark Palette:** Styled the full application with the #0F1115 primary backdrop, #16191E elevated container surfaces, warm gold #C5A267 interactive accents, and high-contrast #E2E4E9 typography framed by subtle #262A33 architectural borders.
- **Guided Questionnaire Flow:** Applied dark theme styling across all 7 questionnaire stages (Target Role, Contact Information, Work Experience, Skills & Competencies, Executive Summary, Education, and Projects & Certifications), featuring AI STAR metric enhancement cards and keyword extraction.
- **Interactive Modals:** Formatted the **ATS Resume Scanner**, **Tailor to Job Spec**, and **Compile & Export** dialogs with high-contrast score badges, tailored difference views, and vector PDF compilation buttons.
- **Template Customizer & Live Preview:** Updated the template selection carousel, typography switches, and spacing density controls with matching dark executive styling, while maintaining authentic crisp document rendering for the resume preview canvas and PDF export pipeline.
