NOT Confidential – For PUBLIC USE

To:

- **Provincial Authorities:** Department of Justice and Public Safety (New Brunswick), Inspections and Enforcement New Brunswick.
- **Law Enforcement Agencies:** Royal Canadian Mounted Police (NB detachments), BNPP Regional Police Service, Fredericton Police Force, Saint John Police Force, Kennebecasis Regional Police Force, and other local police services.
- **Municipal Governments:** City councils and by-law enforcement offices in New Brunswick.
- **International OSINT and Intelligence Networks:** OSINT Foundation, OSINT Industries, Interpol, and relevant international intelligence agencies.
- **Public Safety and Regulatory Bodies:** United Nations Information Service and other global public safety organizations.

Subject: Immediate Enforcement Action Against License Plate Obstructions in New Brunswick

Overview:

This memo serves as an urgent Public Service Announcement (PSA) and directive for coordinated enforcement against license plate obstructions—whether opaque or transparent—across New Brunswick. In full compliance with established OSINT frameworks and international best practices, this initiative mandates the identification and removal of all unauthorized license plate “covers,” above-license plate frames, and excessively tinted windows that impair vehicle identification. Violators will be subject to a fine of \$172.50, as prescribed by provincial law.

1. Background and Rationale

In today's digital and interconnected environment, adherence to open-source intelligence (OSINT) guidelines is paramount. This initiative leverages OSINT methodologies for:

- **Data Collection:** Utilizing publicly available information to identify non-compliant vehicles.

- **Verification and Analysis:** Cross-referencing data from law enforcement databases, municipal records, and community reports.
- **Transparency and Accountability:** Ensuring that all investigative actions remain within legal and ethical boundaries as outlined by national and international OSINT frameworks.

2. Key Directives

a. Identification and Reporting:

- All designated agencies are directed to employ advanced OSINT tools and techniques to systematically identify vehicles with any form of license plate obstruction.
- Data should be collated and shared using secure and standardized reporting formats in line with OSINT best practices.

b. Enforcement and Compliance:

- Per New Brunswick law, any vehicle found obstructing its license plate will incur a fine of \$172.50.
- Enforcement operations must maintain strict adherence to due process, ensuring the rights of individuals are respected.

c. Community and International Cooperation:

- Local law enforcement, municipal bodies, and provincial authorities must collaborate to educate New Brunswickers about the safety implications of license plate obstructions.
- International OSINT communities and intelligence networks are encouraged to share insights and support operational best practices.

3. OSINT Framework Compliance

This initiative is grounded in the following OSINT principles:

1. **Transparency:** All investigative methods and data sources are publicly accessible and ethically sourced.
2. **Accountability:** Every step of data collection, analysis, and enforcement will be documented in accordance with national and international guidelines.
3. **Collaboration:** Multijurisdictional cooperation is essential—this memo serves as a call to both domestic and international partners to share actionable intelligence.

4. Call to Action

Effective immediately, all recipients are instructed to:

- Deploy OSINT-driven operations to identify non-compliant vehicles.
- Inform and engage local communities, ensuring prompt removal of any unauthorized license plate obstructions.
- Report findings through established secure channels to enable swift legal action against violators.

5. Conclusion

The safety and transparency of our transportation systems are critical to public security. By enforcing these measures with the support of cutting-edge OSINT methodologies, we affirm our commitment to upholding the law and protecting the community. I urge all recipients to act decisively and coordinate closely with one another to implement these directives effectively.

Sincerely,
