Dear Ms. Landry:

On behalf of Prime Minister Justin Trudeau, I would like to acknowledge receipt of your email.

Thank you for writing to the Prime Minister. You may be assured that your comments have been carefully reviewed.

I have taken the liberty of forwarding your email to the Honourable Anita Anand, Minister of National Defence, so that she may be made aware of your views.

Once again, thank you for taking the time to write.

Comments/Commentaires : Dear Justin Trudeau,

I am writing to you to bring to your attention the tremendous potential of hemp-derived carbon nano sheets in various industries, including military applications. They have exceptional strength and durability, are lightweight, and have high electrical and thermal conductivity, making them ideal for use in military vehicles, weapons, and ammunition.

Hemp-derived carbon nano sheets can be used to create lightweight, durable tanks, body armor, LAVs, drones, helicopters, aircraft, missiles, rockets,

and other military equipment. Their strength and durability can provide increased protection for soldiers and civilians alike, while reducing fuel consumption and increasing vehicle range.

I urge you to consider the potential of hemp-derived carbon nano sheets in military applications and to explore ways to support their development and adoption.

Thank you for your time and consideration.

Sincerely,

Marie Landry
