

The Organic Global Utopia Manifesto

A Framework for Regenerative Civilization and Peaceful Planetary Stewardship

Marie Seshat Landry
Landry Industries — Organic Revolution 2030

May 25, 2025

Abstract

This document outlines a comprehensive vision for a regenerative and equitable civilization based on the principles of organic science, ecological ethics, social justice, and autonomous intelligence. It is structured into ten foundational pillars guiding a peaceful, planet-healing future.

Pillar 1: Universal Declaration of Organic Rights (UDOR)

- Ratify UDOR globally to protect ecosystems, organic systems, and biodiversity.
- Develop blockchain-verified Organic Certification 2.0.
- Codify ecocide as an international crime against peace and humanity.

Pillar 2: Organic Science & Technology Infrastructure

- Deploy **Seshat's Composites** as universal organic engineering materials.
- Scale ethical AI platforms like *PeaceMakerGPT* and *Google Organics*.
- Create decentralized research labs focused on open-source ecological innovation.

Pillar 3: Renewable Energy & Closed-Loop Systems

- Transition entirely to solar, wind, and hemp biomass.
- Implement zero-waste, compost-integrated infrastructure.
- Develop safe, organic carbon-based energy storage.

Pillar 4: Global Organic Agriculture Transition

- Replace synthetic agriculture with agroecology and food sovereignty.
- Roll out aeroponic hemp systems (e.g., #MissionSahara).
- Create AI-backed seed banks and regenerative farming academies.

Pillar 5: Organic World Economy & Currency

- Launch a hemp-backed currency (HBC) linked to biomass and biodiversity.
- Establish Organic DAO Cooperatives for autonomous, regenerative economics.
- Adopt degrowth and doughnut economics as global economic metrics.

Pillar 6: Ethical Governance & Transparent Intelligence

- Use OSINT AI (e.g., PeaceMakerGPT) to monitor warmongering, hate speech, and corruption.
- Create Global Truth Tribunals to replace war courts.
- Constitutionalize ecological and peace priorities globally.

Pillar 7: Education for Organic Enlightenment

- Integrate Organic Intelligence (OI), emotional literacy, and sustainability into all curricula.
- Build intergenerational, nature-based learning communities.
- Include decolonized, justice-based global history in education systems.

Pillar 8: Equitable Communities & Post-Capitalist Wellness

- Guarantee Universal Basic Organic Needs (UBON): food, water, shelter, health, education.
- Support adult-only eco-cities with consent-driven ethics (e.g., *ADULT PORN PARADISE*).
- Replace punitive justice with healing justice and trauma-informed care.

Pillar 9: Biodiversity Restoration & Planetary Stewardship

- Launch massive-scale hemp reforestation and bioregional rewilding.
- Recognize animal rights and ban industrial exploitation.
- Designate 50% of Earth as permanent biosphere sanctuaries.

Pillar 10: Multiplanetary Organic Diplomacy & Cosmic Ethics

- Export organic systems like *Seshat's Composites* for off-world applications.
- Establish treaties banning militarization of space.
- Draft a *Galactic Organic Charter* for interspecies diplomacy and peace.

Implementation Roadmap (2025–2050)

Phase 1 (2025–2030):

- Legal infrastructure, pilot organic cities, and ethical AI deployment.

Phase 2 (2030–2040):

- Full infrastructure transition, education reform, organic economy scaling.

Phase 3 (2040–2050):

- Planetary rewilding, multipolar diplomacy, and space diplomacy implementation.

“Let us build a civilization where no war, no waste, and no synthetic poison survives—and all life flourishes in peace.”

— Marie Seshat Landry
