Subject: Partnership Opportunity: Implementing "Ecosia Organics" for Enhanced Organic Search Results

Dear Ecosia Team,

I hope this message finds you well. My name is Marie Seshat Landry, and I am the CEO of SearchForOrganics.com. At SearchForOrganics.com, we are dedicated to promoting organic products and sustainable living through advanced search technologies.

I am writing to offer you a no-code solution to enhance your search engine's capabilities with a new feature we have successfully implemented and demonstrated with "Google Organics." This feature, which we call "Ecosia Organics," simply involves adding the keyword "organic" to every query processed by your search engine.

By integrating this solution, Ecosia users will benefit from more relevant and targeted organic search results, aligning with their interests in sustainability and environmental responsibility. We are confident that this enhancement will not only improve user experience but also further strengthen Ecosia's mission to plant trees and support eco-friendly initiatives.

We are also in the process of implementing similar solutions with other major search engines, such as "Bing Organics." I am throwing you the ball, and I believe that together we can make a significant impact on promoting organic and sustainable living.

I would love to discuss this opportunity further and explore how we can collaborate to bring "Ecosia Organics" to life. Please reply to this email to initiate ongoing discussions.

Thank you for your time, and I look forward to hearing from you soon.

Best regards,

Marie Seshat Landry
CEO, SearchForOrganics.com

[SearchForOrganics.com](<https://marielandryceo.com>)

PS: By “organic,” we refer to products and practices that are certified natural, sustainable, and free from synthetic chemicals. This encompasses everything from food and clothing to farming methods and personal care products, emphasizing environmental responsibility and health.
