

Wildfire Resilience Peace Mission

Regenerate Canada

April 27, 2025

Mission Goal:

Build a wildfire-resilient Canada by integrating Indigenous leadership, green innovation, ethical investment, and community-led climate adaptation — fostering national unity, sustainable growth, and environmental peace.

Key Pillars

1. Indigenous-Led Stewardship Programs

Action: Fund and empower Indigenous fire management teams (e.g., cultural burning, traditional ecological knowledge).

Purpose: Restore natural fire cycles, reduce fuel loads, and honor Indigenous land guardianship.

Peace Value: Healing historical injustices while building local leadership and community resilience.

2. Ethical Green Infrastructure Investment

Action: Launch public-private partnerships (PPPs) to build climate-resilient housing, fire-break corridors, and smart evacuation systems.

Purpose: Ensure new developments are wildfire-adaptive, sustainable, and community-centered.

Peace Value: Protect vulnerable populations while stimulating ethical, organic economic growth.

3. Wildfire Early Detection and Innovation Labs

Action: Establish wildfire innovation hubs across provinces to develop AI-driven detection, drone surveillance, satellite monitoring, and eco-friendly firefighting methods.

Purpose: Enable faster response and smarter fire management.

Peace Value: Reduce human suffering and ecological loss through proactive technology.

4. Community Climate Corps

Action: Create a national service corps (like a “Climate Peace Corps”) where citizens work on wildfire recovery, reforestation, and climate adaptation projects.

Purpose: Train young Canadians and displaced workers in climate resilience skills.

Peace Value: Forge unity, purpose, and a shared mission of national healing.

5. Resilient Finance Systems

Action: Promote ethical insurance models that prioritize rebuilding green; create climate adaptation bonds for communities.

Purpose: Secure fair and accessible funding for fire-affected populations.

Peace Value: Ensure economic justice and empowerment for all citizens.

Measurement of Success

- 50% reduction in wildfire damage by 2030.
- 500 Indigenous fire stewardship leaders trained and funded.
- \$1 billion invested annually into green fire-adaptive infrastructure.
- 100,000 Canadians serving in the Community Climate Corps by 2028.

Slogan

Regenerate Canada: Fire to Forest, Crisis to Community, Pain to Peace.
