Public Press Release

Subject: Search For Organics: Revolutionizing Eco-Friendly Digital Search: Introducing Certified Organic Search by SearchForOrganics.com

By: Marie Seshat Landry

Moncton, NB, Canada

March 30th, 2024

FOR IMMEDIATE RELEASE

Launch of Certified Organic Search: A Digital Revolution by Marie Seshat Landry and SearchForOrganics.com

Introducing "Search For Organics" technology (SFO)," "Google Organics," "Bing Organics," and "Yahoo Organics" (unnoficial names) on SearchForOrganics.com

In a groundbreaking development for digital search and sustainability, Marie Seshat Landry proudly announces the debut of Certified Organic Search across major platforms: "Search For Organics (SFO)," "Google Organics," "Bing Organics," and "Yahoo Organics," all housed within SearchForOrganics.com. This pioneering initiative marks a clear distinction between traditional organic search results and the targeted discovery of certified organic products and information, setting a new standard for eco-conscious digital navigation.

Certified Organic Search: Elevating Eco-Conscious Digital Discovery

Certified Organic Search goes beyond the conventional organic search by meticulously curating results that spotlight certified organic goods and services. This innovative approach ensures that users seeking a sustainable lifestyle can easily find information and products that meet

stringent organic standards. By creating a dedicated space for certified organic searches on platforms like Google Organics, Bing Organics, and Yahoo Organics, Marie Seshat Landry bridges the gap between the desire for eco-friendly options and the ability to find them online.

"Search For Organics": A Hub for Authentic Organic Searches

SearchForOrganics.com emerges as the central hub for Certified Organic Search, offering a no-code, user-friendly gateway to genuine organic products and resources. This initiative provides a clear solution for those who prioritize environmental sustainability and health-conscious choices, ensuring that their search leads to trusted, certified organic options without the clutter of unrelated or inauthentic results.

A No-Code Revolution: Simplifying Access to Sustainability

Recognizing the importance of accessibility, Marie Seshat Landry's Certified Organic Search initiative introduces a straightforward, no-code implementation across digital platforms. "For those who need code: Sorry, but the job's already done with a no-code "crack". It was a no-brainer to me," states Landry. This effortless approach invites search engines and websites to adopt and promote Certified Organic Search, by **embedding the keyword "organic" into every search**, democratizing access to organic products and contributing to a more sustainable world.

Join the Movement Towards a More Organic Digital World

The launch of Certified Organic Search is more than an innovation; it's a call to action for digital platforms, consumers, and organic advocates to embrace and advance the movement towards sustainability. "Search For Organics" and its counterparts represent a major leap forward in making certified organic living accessible to all, championing a future where digital searches and sustainable living go hand in hand.

PS: What Is Certified Organic?

Certified organic refers to agricultural products and other items that have been produced, stored, processed, and handled in accordance with the strict standards of organic agriculture. These standards vary by country but generally prohibit the use of synthetic pesticides, herbicides, fertilizers, genetically modified organisms (GMOs), antibiotics, and growth hormones. Certification is carried out by authorized organizations to ensure that products meet these rigorous standards, providing consumers with a guarantee of the organic integrity of the products they purchase. Choosing certified organic supports sustainable farming practices, environmental health, and a toxin-free diet.
