Location: [Moncton, Canada]

Executive Summary

As a dynamic entrepreneur and CEO, I lead multiple ventures including Global Organic Solutions, Big Organic Network, and SearchForOrganics.com, along with innovative projects like MissionGPT, The Second Illuminati, and the New Pyramids project. My work spans various sectors, integrating sustainability with advanced technology to drive significant social and environmental impact.

Professional Experience

Founder and CEO

Global Organic Solutions | Big Organic Network | SearchForOrganics.com

- Developed and executed business strategies that position these entities at the forefront of the organic and sustainability markets.
- Leveraged cutting-edge technology to enhance organic product accessibility and market intelligence.
- Spearheaded partnerships and initiatives that promote organic practices globally.

Project Lead

MissionGPT | The Second Illuminati | The New Pyramids Project

- Pioneering advanced applications of AI and other technologies to tackle global issues related to energy, education, and infrastructure.
- Leading multidisciplinary teams to innovate and implement sustainable, transformative projects.

Key Achievements

- Successfully expanded organic market reach by integrating AI-driven insights into consumer behavior and supply chain efficiencies.
- Advocated for ethical AI use, significantly influencing policy and educational frameworks around technology and sustainability.
- Initiated and guided projects that are set to redefine architectural and societal norms through the New Pyramids project.

Skills

- Advanced knowledge in open-source intelligence (OSINT)

- Strategic leadership in technology and sustainability sectors
- Expertise in digital marketing, SEO, and e-commerce
- Proficient in project management and cross-disciplinary collaboration

Interests and Passions

- Committed to harnessing technology for sustainable development and social good.
- Enthusiast of historical reconstruction and modern applications through projects like The Second Illuminati and New Pyramids.

Self-Directed Learning

- Continuously acquiring knowledge in the fields of artificial intelligence, sustainable business practices, and global market trends.

Professional Development

- Regularly engaging with industry leaders and academic forums to stay ahead of technological and environmental advancements.
