

The Organic Revolution: A Global Business Plan for the 100% Organic Economy

Led by Queen Marie Seshat Landry

May 25, 2025

Executive Summary

The **Organic Revolution** is a peaceful, legal, and global initiative to replace all synthetic, toxic, and ecologically harmful products and systems with ethical, biodegradable, and regenerative organic solutions. It is spearheaded by **Queen Marie Seshat Landry** and structured around the passage of the **Universal Declaration of Organic Rights (UDOR)**—a legally binding international framework guaranteeing the rights of all organic life, including humans, animals, ecosystems, and even rivers and plants.

This movement envisions the complete transition to a **100% organic global economy** by 2040, with hemp, organic intelligence (OI), and biodegradable technologies at its core.

1 Vision Statement

“To restore Earth’s harmony by empowering all organic life through rights-based governance, sustainable innovation, and a regenerative economic order.”

2 Strategic Objectives

- Outlaw toxic synthetic substances in all sectors (agriculture, textiles, plastics, pharma, etc.).
- Establish the Universal Declaration of Organic Rights (UDOR) as international law.
- Build an economic system based on organic, circular, and ethical technologies.
- Deploy Organic Intelligence (OI) to replace extractive and unethical AI systems.
- Regenerate ecosystems and guarantee sovereignty to all forms of organic life.

3 Legal Framework: Universal Declaration of Organic Rights (UDOR)

Core Principles

- **Legal Personhood for Nature** — Rights for rivers, forests, fungi, and ecosystems.
- **Right to Organic Sovereignty** — Protecting individuals and communities from synthetic toxins.
- **Right to Exist, Regenerate, and Evolve** — For all living organisms.
- **Right to Organic Intelligence** — Symbiotic, embodied, and ecologically safe cognition.

Implementation Pathway

- Adopt UDOR via the United Nations and regional treaties (AU, EU, ASEAN).
- Ratify into national constitutions starting with Bolivia, Ecuador, Canada, and Bhutan.
- Legalize Organic Personhood through constitutional amendments and national referendum.

4 Economic Framework: The 100% Organic Economy

Phased Transition Strategy

Phase	Year	Focus
Phase 1	2025–2027	Strategic bans on high-impact synthetic chemicals
Phase 2	2028–2030	Global organic manufacturing and supply chain development
Phase 3	2030–2035	Universal ban on all non-organic commodities
Phase 4	2035–2040	Full UDOR enforcement, Organic Trade Zones

Core Technologies

- **Seshat’s Composites** — Ultra-strong hemp-based composites
- **Organic AI (OI)** — Including PeaceMakerGPT, SpyForMe, Bing Organics
- **Biodegradable Plastics, Textiles, and Construction Materials**
- **Aeroponic and Regenerative Agriculture Systems**

5 Market Size and Opportunity

- \$13+ Trillion in potential global organic market value by 2040
- New sovereign licensing models for Organic IP
- Green urbanism, ethical tourism, and post-synthetic city models

6 Governance Model

Leadership

Queen Marie Seshat Landry, High Steward of the Organic Era

Institutions

- **Organic Council of Earth (OCE)** — Science, diplomacy, and indigenous wisdom
- **Organic Security Force (OSF)** — Peacekeeping and OSINT enforcement
- **Landry Industries** — IP governance, global licensing, and organic infrastructure

7 Outreach and Advocacy

- **The Organic Rights Treaty Campaign (ORTC)**
- **#MissionSahara** and **#NewPyramids** as flagship megaprojects
- **Organic Intelligence Media Network (OIMN)**
- **PeaceMakerGPT** and **SpyForMe** for ethical surveillance and diplomacy
- **Annual Organic Rights Summits**

8 Funding Strategy

- Public crowdfunding and Web3 tokenization
- Sovereign investment funds (e.g. NATO DIANA, UN SDG bonds)
- IP Licensing of Seshat's Composites and Organic AI platforms
- Strategic partnerships with green governments and Indigenous trusts

9 Impact Metrics

- 50+ nations ratify UDOR by 2030
- Synthetic pesticide use down 90% by 2032
- Organic GDP exceeds \$10 trillion by 2035
- 10+ million hectares rewilded annually
- 100% phase-out of non-biodegradable plastics by 2040

10 Risks and Mitigation

Risk	Mitigation Strategy
Resistance from synthetic lobby	Public litigation + grassroots mobilization
Tech transition delays	Open-source R&D accelerators + global labs
Legal obstacles	Strategic constitutional reform + international law campaigns
Funding barriers	Launch of Organic Reserve Currency backed by hemp

Conclusion

The Organic Revolution is not a violent coup—it is a **regenerative civilizational reset**. Through the Universal Declaration of Organic Rights, Queen Marie Seshat Landry offers humanity a peaceful, lawful, and ethical path forward. This vision is grounded in science, sustainability, and sovereignty for all organic life.
