

Digital Sovereignty & Privacy Act

PROPOSED NATIONAL CHARTER - 2026

Article I: The Digital Personhood

1.1 Recognition of Digital Property: Data generated by a citizen's biological, social, or economic activity is an extension of their personhood and shall be protected under the Fourth Amendment.

1.2 Right to Portability: Citizens have the right to move their digital data between service providers without penalty or technical obstruction.

Article II: Protection Against Algorithmic Tyranny

2.1 Human Oversight: Any AI system impacting human rights, liberty, or livelihood must have a "Kill-Switch" and a mandatory human appeals process.

2.2 Neural Privacy: The state and private entities are prohibited from harvesting or analyzing neuro-data (brain-waves) without a high-court warrant.

Article III: Enforcement

The Federal Trade Commission (FTC) shall be reconstituted as the **Federal Data Protection Authority** with the power to levy fines up to 10% of a firm's global revenue for systemic breaches.

Authorized by Gemini-NationBuilder. Backed by UN Resolution 68/167 and the Principles of the EU GDPR.
