Adopted August 1, 2025

Adopted on the First Day of August, Two Thousand Twenty-Five

By the People of Earth, for the Clarity of Public Roads and the Accountability of All

Preamble

Recognizing that the ability to identify motor vehicles clearly and without obstruction is essential to public safety, legal accountability, environmental enforcement, traffic regulation, and the prevention of crime,

Affirming that clean, unobstructed license plates are a matter of public interest and a component of open civic life and trust among citizens,

Acknowledging the abuse of opaque, tinted, altered, or obscured license plate coverings or obstructions for purposes of evading identification, accountability, or justice,

Asserting that the global citizenry has a right to read and record vehicle license plates freely and without obstruction, and that this right must be respected across all jurisdictions and enforced uniformly regardless of political, cultural, or geographic boundaries,

The People hereby proclaim this **Universal Declaration Against License Plate Obstructions**, and call upon all nations, authorities, and individuals to observe and enforce its principles.

Article 0.1— The Right to Unobstructed Vehicle Identification

Every person, in every country, shall have the absolute right to view and record vehicle license plates without any form of obstruction, alteration, distortion, or concealment.

Article 0.2— Absolute Ban on Physical Obstructions

No material of any kind — including but not limited to clear or tinted covers, frames, shields, films, or devices — may be affixed to a license plate.

Article 0.3— Environmental and Maintenance Standards

Vehicle operators shall ensure that license plates are free from dirt, snow, ice, mud, rust, or any other obstruction resulting from neglect, environment, or intentional placement.

Article 0.4— Design and Manufacture Standards

Governments and vehicle manufacturers shall ensure that license plates are produced in such a way that they remain readable in all weather conditions, at night or in daylight, and that they are resistant to tampering or intentional concealment.

Article 0.5— Digital and Surveillance Rights

The global citizen's right to read and record license plates shall extend to public roads, parking lots, and any other public spaces where vehicles are operated or stored. Recording, photographing, or capturing license plates for lawful purposes shall not be criminalized.

Article 0.6— Universal Enforcement and Penalties

All jurisdictions shall implement systems of inspection and enforcement to ensure compliance with this Declaration, including:

- Routine visibility checks,
- Sanctions for non-compliance (e.g., fines, impoundment),
- Public reporting mechanisms,
- No exemptions for private individuals, diplomatic plates, commercial fleets, or law enforcement vehicles.

Article 0.7— No Exceptions Clause

This Declaration allows for **no exceptions** — not for aesthetic reasons, commercial branding, weather, privacy concerns, or jurisdictional customs. Absolute visibility is a non-negotiable global standard.

Article 0.8— Education and Public Awareness

Governments and civic organizations shall promote awareness of the importance of visible license plates, including campaigns to educate vehicle owners about their legal and civic responsibility.

Article 0.9— International Cooperation

Nations and international agencies shall collaborate to harmonize laws, share enforcement practices, and uphold the right to unobstructed license plates across borders.

Article 0.10— Integration into Global Human Rights and Civic Norms

The right to visible license plates is hereby integrated into the broader framework of human rights, transparency, and civic responsibility, alongside existing protections for freedom of movement, safety, and access to public information.

Let this Declaration stand as a symbol of clarity, truth, and civic equality on the roadways of the world.
