

Universal Declaration: "Non-Organics Are Illegal - Prohibition of GMOs and Synthetic Chemicals in Food"

Preamble

Recognizing the fundamental right of all people to access natural, organic, and healthy food, free from harmful synthetic chemicals and genetically modified organisms (GMOs);

Acknowledging the environmental, health, and social harms caused by the use of GMOs and synthetic chemicals in food production;

Affirming the urgent need to protect ecosystems, biodiversity, and public health through the adoption of sustainable and organic agricultural practices;

We, the undersigned, declare that non-organics - including GMOs and synthetic chemicals in food - are illegal under this Universal Declaration, established to ensure the health and well-being of current and future generations.

Articles

Section I: The Right to Organic Food

Article 1: Right to Pure and Natural Food

All individuals have the right to access food that is free from GMOs, synthetic chemicals, and harmful additives, ensuring health and well-being.

Article 2: Right to Transparent Food Systems

Consumers have the right to full transparency about the origin, ingredients, and production methods of the food they consume.

Article 3: Right to Organic Agriculture

Farmers and producers have the right to engage in organic agriculture, free from contamination by

GMO crops and synthetic chemicals.

Section II: Prohibition of Non-Organics

Article 4: Ban on GMOs in Food Production

The cultivation, production, distribution, and sale of genetically modified organisms (GMOs) in food are strictly prohibited.

Article 5: Ban on Synthetic Chemicals in Food

The use of synthetic pesticides, herbicides, fertilizers, and additives in food production and processing is strictly prohibited.

Article 6: Accountability for Non-Organic Practices

Individuals, corporations, or governments found responsible for violating these prohibitions shall face penalties and be held accountable under international law.

Section III: Promoting Organic Agriculture

Article 7: Support for Organic Farmers

Governments and international bodies shall provide financial and technical support to farmers transitioning to organic and sustainable agricultural practices.

Article 8: Protection of Ecosystems and Biodiversity

Organic farming practices shall prioritize the protection of ecosystems, soil health, and biodiversity, ensuring a harmonious relationship with nature.

Article 9: Research and Development for Organics

Scientific research and innovation shall focus on advancing organic farming methods and natural alternatives to synthetic chemicals.

Section IV: Global Education and Awareness

Article 10: Education on Organic Benefits

Governments and civil society shall implement educational programs to inform the public about the

health, environmental, and ethical benefits of organic food.

Article 11: Consumer Empowerment

Consumers shall be empowered through labeling and certification systems to identify and choose organic products with confidence.

Article 12: Public Awareness Campaigns

Global awareness campaigns shall highlight the dangers of GMOs and synthetic chemicals, promoting a shift toward sustainable food systems.

Section V: Implementation and Monitoring

Article 13: International Enforcement

An international regulatory body shall oversee the implementation of this declaration, ensuring compliance and addressing violations of the prohibition on non-organics.

Article 14: Continuous Monitoring and Evaluation

Regular monitoring and evaluation shall be conducted to assess progress in the transition to organic agriculture and food systems.

Article 15: Support for Affected Communities

Communities and workers impacted by the transition from non-organic to organic practices shall receive support to adapt and thrive in sustainable food systems.

Conclusion

This Universal Declaration calls for the elimination of non-organics - including GMOs and synthetic chemicals - from food systems to safeguard public health, environmental integrity, and global food security. By embracing organic agriculture, we commit to creating a sustainable, equitable, and healthy future for all.

Together, let us honor the natural balance of the earth and ensure that food remains a source of nourishment, health, and harmony.
