

Final WTF Report - WTF6.0Mini

Prepared by: [Marie Seshat Landry]

April 4, 2025

1 Introduction

This report follows the WTF 6.0 framework, a modern scientific method designed for comprehensive strategic analysis and critical thinking. The method integrates diverse intelligence sources, analytical methods, AI augmentation, and ethical considerations into a structured pathway for inquiry and action [[4]](https://poe.com/citation?message_id=371799617922citation=4).

2 Core Principles

The WTF 6.0 framework is built upon several core principles:

- Empirical observation
- Logical reasoning
- Iterative refinement
- Ethical responsibility

These principles guide the analysis and inform decision-making processes [[4]](https://poe.com/citation?371799617922citation=4).

3 Detailed Steps

The following sections outline the seven iterative steps of the WTF 6.0 framework:

3.1 Step 1: Deep Observation

Goal: Achieve a thorough understanding of the core problem (X).

Objective: Create a rich foundation by exploring fundamental elements and establishing a Problem Definition Statement (PDS).

3.1.1 Process Activities

1. Initiate the inquiry.
2. Gather contextual information.
3. Identify boundaries and systemic interactions.
4. Formulate the Problem Definition Statement (PDS).

3.2 Step 2: Integrated Intelligence

Goal: Utilize diverse intelligence streams to inform analysis.

Objective: Incorporate relevant intelligence sources (e.g., OSINT, HUMINT) into the inquiry process [[4]](https://poe.com/citation?message_id=371799617922*citation* = 4).

3.3 Step 3: Applied Methods

Goal: Employ critical and creative thinking methods.

Objective: Utilize over 100 analytical methods to enhance understanding and generate insights [[4]](https://poe.com/citation?message_id=371799617922*citation* = 4).

3.4 Step 4: AI Augmentation

Goal: Leverage AI as an analytical partner.

Objective: Integrate AI tools to support data analysis and interpretation [[4]](https://poe.com/citation?message_id=371799617922*citation* = 4).

3.5 Step 5: Synthesis of Findings

Goal: Build a coherent narrative from insights.

Objective: Explain relationships, causality, and significance of findings [[5]](https://poe.com/citation?message_id=371799617922*citation* = 5).

3.6 Step 6: Communication of Results

Goal: Clearly convey key findings and recommendations.

Objective: Tailor communication to specific audiences, ensuring clarity and actionable insights [[6]](https://poe.com/citation?message_id=371799617922*citation* = 6).

3.7 Step 7: Dynamic Reiteration

Goal: Ensure continuous improvement through feedback.

Objective: Adapt findings and methodologies based on new insights and stakeholder feedback [[6]](https://poe.com/citation?message_id=371799617922*citation* = 6).

4 Conclusion

The WTF 6.0 framework serves as a dynamic ecosystem for generating understanding and driving action across various domains. By integrating critical thinking and ethical responsibility, it aims to navigate ambiguity and inform decision-making effectively [[4]](https://poe.com/citation?message_id=371799617922*citation* = 4).
