

#GreenSovereignRussia

Replacing Oil Oligarchy with Hemp Democracy

Blanketing Russia's Degraded Soils and Industries with 50,000 Organic Production Facilities

Presented by Marie Landry's Spy Shop

A Trillion-Dollar Mission for the People of Russia and the International Community

May 2025

Executive Summary

#GreenSovereignRussia is a bold, trillion-dollar initiative to transform Russia from a petrostate into a decentralized, regenerative, and democratic hemp-powered economy. This mission proposes the restoration of Russia's degraded soils and the development of over 50,000 unique hemp-based industries—enabling ecological healing, energy independence, and equitable economic growth.

This is not only a transition away from fossil fuels, but a comprehensive pathway to an organic future where power is decentralized, land is healed, and economic sovereignty is returned to the people.

Mission Objectives

1. **Ecological Regeneration:** Blanket-deploy regulated hemp systems to restore degraded lands.
2. **Industrial Democracy:** Launch 50,000 hemp-based production facilities across all sectors.
3. **Displace Petro-Oligarchy:** Replace oil dependency with green biofuels and hemp innovation.
4. **Seshat's Composites:** Deploy advanced hemp-carbon-lignin materials for civil and defense uses.
5. **Global Standards:** Ensure full compliance with WTO, ISO, and EU organic certification.
6. **Sovereign Economic Architecture:** Empower co-ops, community trusts, and national green funds.

Phased Implementation Plan

Phase 1: Framework & Foundation (2025–2026)

- Enact the **Russian Hemp Sovereignty Act**.

- Map degraded soils with AI-powered satellite reconnaissance.
- Launch pilot hubs with Seshat's Composites R&D facilities.

Phase 2: Infrastructure & Industry Scale-Up (2026–2028)

- Build 10,000 hemp facilities focused on energy, food, construction, and textiles.
- Begin large-scale biogas and composite-based infrastructure transitions.

Phase 3: National Transition (2028–2030)

- Expand to 50,000 diversified hemp industries.
- Phase out petroleum exports.
- Become a leading exporter of certified organic hemp technologies.

Industrial Sectors & Outcomes

Sector	Hemp Solution	Impact
Energy	Hemp biofuels & biogas	Renewable fuel replacing fossil energy
Construction	Hempcrete & Seshat's Composites	Green infrastructure & civil defense
Plastics	Biodegradable polymers	Eliminates microplastics and toxic waste
Pharma & Food	Cannabinoids & hemp protein	Nutritional and medical sovereignty
Defense & Transport	Lightweight composites	Strategic independence with green materials

Strategic Alignment

- Aligned with UN SDGs: Goals 7, 9, 12, and 13.
- Compatible with EU Green Deal, ISO 17065, WTO rules.
- Open to NATO DIANA, SBIR, and multilateral climate investments.

Financing Model

- \$250B Green Bonds \$300B Sovereign Hemp Fund
 \$250B Export Revenues \$200B International Grants & Carbon Markets

Social and Diplomatic Impact

- Uplifts rural, Indigenous, and working-class communities.
- Advances LGBTQ+ inclusion through green employment.
- Builds peace by reducing fossil-fueled geopolitical tension.

Conclusion

GreenSovereignRussia is a plan for the people. It ends petro-feudalism and offers Russia an organic renaissance—powered not by war, but by hemp; not by oligarchy, but by co-operative prosperity.

This document was developed and released by Marie Landry's Spy Shop. We invite the people of Russia, the international community, and global investors to join us in manifesting this vision of a regenerative, sovereign, and peaceful future.
